

HARSHIT GUPTA

APM | AI-Driven B2B SaaS & Cybersecurity | +91-9522012835 | [E-mail](#) | [LinkedIn](#)

Results-driven Product Manager with 1+ years of experience building AI-driven B2B SaaS and cybersecurity platforms across 0→1 and growth stages. Strong expertise in product strategy, GTM execution, pricing innovation, enterprise delivery, and AI platform development. Proven record of driving revenue growth, improving platform efficiency, and building scalable AI security automation systems using data, SQL analytics, and experimentation frameworks.

EDUCATION

Malviya National Institute of Technology (MNIT Jaipur) — B.Tech Chemical Engineering Jan 2021 – May 2025

WORK EXPERIENCE

Kratikal Tech Pvt. Ltd. - Associate Product Manager Jan 2025 – Present
(Noida, India)

AutoSecT - MSSP Market Expansion & Revenue Growth

- Defined **ICP** and repositioned AutoSecT as **MSSP-focused platform** enabling entry into new security service markets.
- Conducted **20+ customer discovery** calls to refine scan-based pricing, driving **\$12.5K MRR**.
- Designed **domain approval optimization** improving client scanning efficiency and MSSP adoption rates.
- Supported **enterprise deals (HROne, Honda)** via technical solutioning, pricing strategy & architecture walkthroughs.

AI Security Verification Platform — LLM + RAG Automation

- Led multi-stage **AI vulnerability verification pipeline** using NVD intelligence datasets.
- Built automated exploit generation and validation workflows using **LLM pipelines**.
- Introduced **RAG-based infrastructure** scanning reducing false positives to **near-zero** vs **20%** industry benchmark.
- Ran **AI evaluation** experiments to benchmark model accuracy and **false-positive** reduction.
- Productized AI outputs into enterprise-ready security insights with **explainability layers**.

Platform Performance, Data & Product Ownership

- Reduced crawl time by **35%** and reduced false positives by **40%** using contextual AI verification layers.
- Implemented **AI requirement tooling** reducing engineering iteration cycles and improving delivery predictability.
- Defined core **product KPIs** across activation, adoption, scan success rate, and enterprise expansion metrics.
- Led **roadmap discussions** aligning Engineering, Security, and Leadership with **enterprise GTM** priorities.
- Prioritized performance improvements using **scan telemetry insights**.

BoloForms - Product Management Intern May 2024 – Jul 2024
(Pune, India)

- Reduced PDF rendering latency from **4s → 100ms** via async rendering and lazy loading architecture for **20K+ users**.
- Built **webhook chatbot automation** reducing dashboard navigation friction and improving workflow efficiency.
- Contributed to PLG initiatives supporting **\$10K MRR** growth expansion.
- Analyzed user behavior and workflow drop-offs to identify bottlenecks and improve feature adoption.
- Partnered with engineering to prioritize performance and usability improvements using customer feedback insights.

Google Developer Student Clubs - Technical Lead May 2023 – Jan 2024
(MNIT Jaipur)

- Led 120+ member** technical community focused on AI tools, product development & applied software engineering.
- Mentored students on real-world AI product deployment workflows and system architecture thinking.

SKILLS

Product & Business: Product Strategy, GTM Strategy, Pricing & Packaging, Experimentation Frameworks, Product Analytics, Customer Discovery, Enterprise Product Delivery

AI & Platforms: LLMs, RAG Systems, AI Security Automation, Cybersecurity SaaS, CSPM, VMDB Concepts, API Integrations

Data & Analytics: SQL (BigQuery), Funnel Analysis, KPI Design, Experiment Tracking, Product Metrics

Tools: Jira, Manus, Lovable, Product Analytics Dashboards, MixPanel, Looker Studio.

ACHIEVEMENTS

Grew Twitter account to **1,300+ followers** by completing and publicly documenting a **100 Days of Code** challenge.

Qualified **Kishore Vaigyanik Protsahan Yojana (KVPY) 2018** with a score of **59/100**

Cleared **Pre-Regional Mathematical Olympiad (Pre-RMO) 2016**
