

HARSHIT GUPTA

Product Manager | AI Product Manager | Technical Product Manager | B2B SaaS

Phone: +91-9522012835 | guptaharshit619@gmail.com | [GitHub](#) [LinkedIn](#) [Globe](#)

SUMMARY

Product Manager with 2+ years building AI-driven B2B SaaS, cybersecurity and compliance platforms from 0 to 1. Currently launching GreenTick.ai, a Meta WhatsApp Cloud API platform for Indian SMEs, at Suscin Innovation Labs. Previously drove \$12.5K MRR through data-backed pricing and cut false positives to near-zero with LLM + RAG automation at Kratikal. Strong in product strategy, roadmap, go-to-market (GTM), pricing and packaging, backed by SQL (BigQuery), Python and product analytics.

EDUCATION

Malviya National Institute of Technology (MNIT), Jaipur | B.Tech, Chemical Engineering

Jan 2021 to May 2025

WORK EXPERIENCE

Suscin Innovation Labs LLP, Pune | Product Manager

Feb 2026 to Present

- Lead the 0 to 1 launch of GreenTick.ai, an official Meta WhatsApp Cloud API Business Solution Provider (BSP) platform for Indian SMEs, owning roadmap, PRDs, go-to-market and ICP positioning, and driving the first 20 signups in 1 month across SEO, GEO and Reddit.
- Specify 4 core Cloud API flows as PRDs and user stories: WABA onboarding, message template approval, webhook event handling and REST/JSON integrations.
- Benchmark established WhatsApp BSPs and run user research to design a new multi-tier pricing model that keeps every feature in the Basic plan to lower adoption friction.
- Build the organic growth engine: SEO and GEO audits and fixes plus blog content strategy, growing organic clicks by 20% in 4 months.
- Run Agile/Scrum release planning and backlog grooming with engineering, using Claude Code and Cursor to prototype and validate flows before handoff.

Kratikal Tech Pvt. Ltd., Noida | Associate Product Manager

Jan 2025 to Feb 2026

- Defined the ICP and repositioned AutoSecT as an MSSP-focused platform; ran 20+ customer discovery calls to refine scan-based pricing, driving \$12.5K MRR.
- Led a multi-stage AI vulnerability verification pipeline (NVD datasets, LLM exploit generation); RAG-based scanning cut false positives to near-zero vs a 20% industry benchmark, validated through AI evals.
- Reduced crawl time by 35% and false positives by 40% using contextual AI verification layers prioritized from scan telemetry.
- Defined product KPIs across activation, adoption, scan success rate and enterprise expansion; supported enterprise deals (HROne, Honda) with solution design and pricing strategy.

BoloForms, Pune | Product Management Intern

May 2024 to Jul 2024

- Reduced PDF rendering latency from 4s to 100ms via async rendering and lazy loading for 20K+ users.
- Contributed to PLG initiatives supporting \$10K MRR growth; analyzed workflow drop-offs and built webhook chatbot automation to improve feature adoption.

PROJECTS

GRC-Flow: AI-Assisted DPDP Act Compliance SaaS

app.grc-flow.com | grc-flow.com

- Identified a regulatory gap: India's DPDP Act duties apply from 13 May 2027, with penalties up to ₹250 crore. Scoped a DPDPA-only product for 2 segments, privacy consultants and in-house compliance teams, instead of a generic GRC tool.
- Designed the 8-step user journey and prioritized 15+ modules, including consent, rights requests with a 90-day deadline, breach reporting with a 72-hour deadline, a 5-by-5 risk register, DPIA and an audit log.
- Set the product principle "AI you can defend in front of an auditor" as 5 rules: law-cited findings, a mandatory human review gate, AI-checked evidence, clear labels for unreadable files and delivery locked until every check passes.
- Directed Claude Code and other AI coding agents to ship 47 screens with 350 automated tests, and owned system design, access control, encryption, audit logging, CI/CD and security decisions. Integrated 9+ LLM providers and a read-only MCP server, hosted on Oracle Cloud in Mumbai (India West).
- Built the go-to-market kit: intro deck, discovery questions, 10-minute demo script and a competitor comparison against DPDP.ai, Sprinto and spreadsheets, plus Solo, Team and Firm tiers and a 4-week pilot motion.

Sarathi: Supervised School-Commute Network for Classes 1 to 5

[GitHub](#) | [Case Study](#) | [Live Prototype](#)

- Designed a parent-paid, school-supported commute product end to end: 4 personas, 5Es journey map and RICE prioritization; defined MVP scope and PO features and built an 8-screen clickable prototype.
- Set the north star metric (Weekly Verified Safe Handoffs) with guardrails: 0 children left behind, 99.5%+ verified handoffs, under 90s SOS response, 18%+ contribution margin.
- Specified a local AI feature (quantized Qwen2.5-3B, YOLOv8n) with DPDP Act 2023 consent, human-in-the-loop escalation and a Gurugram pilot plan.

SKILLS

Product & Business: Product Strategy, Product Roadmap, PRDs, User Stories, Go-to-Market (GTM), Pricing & Packaging, ICP Definition, Customer Discovery, User Research, Market Research, GEO, Competitive Analysis, Sales Enablement, RICE Prioritization, MVP Scoping, Backlog Management, Product Lifecycle, Stakeholder Management, Cross-functional Collaboration, OKRs, PLG, SEO, Agile/Scrum

AI & Domain: LLMs, RAG Systems, AI Evals, Prompt Engineering, MCP (Model Context Protocol), Human-in-the-Loop AI, Cybersecurity SaaS, CSPM, VMDR, DPDP Act 2023, GRC, WhatsApp Business API, Meta Cloud API, Webhooks, CPaaS, Chatbots, REST API & JSON

Data & Analytics: SQL (BigQuery), Python, Power BI, Looker Studio, Mixpanel, Funnel Analysis, KPI Design, Product Metrics, Product Analytics, A/B Testing, Experimentation

Technical Fluency: System Design & Architecture, REST APIs, Webhooks, Backend Logic, Data Modeling, Databases, Migrations, Auth & Login, RBAC, Sessions, Encryption, Tamper-Evident Audit Logs, Oracle Cloud, Data Residency, CI/CD, Version Control, Staged Releases, Security, Rate Limiting, Caching & CDN, Error Tracking & Logs, Monitoring & Alerts, Health Checks, Testing, Scaling

Tools: Claude Code, Cursor, Manus, Jira, GitHub, Archify, F5Bot, Clerk, PRAW, Crawl4AI
